U.S. Serial No. 10/612,082 Filed: July 2, 2003

## **CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application:

1- 102. (Canceled)

103. (Previously Presented) A method of making a prosthesis comprising the steps of: extruding a thermoplastic elastomer with the aid of a blowing agent, to produce a foamed graft; and

reticulating and optionally annealing the foamed graft to effect an open-cell structure.

- 104. (Original) The method of Claim 103 wherein the blowing agent comprises a physical blowing agent.
- 105. (Original) The method of Claim 103 wherein the blowing agent comprises a chemical blowing agent.
- 106. (Original) The method of Claim 103 wherein the blowing agent comprises physical and chemical blowing agents.
- 107. (Original) The method of Claim 103 wherein the thermoplastic elastomer comprises a polyurethane.
- 108. (Original) The method of Claim 103 wherein the thermoplastic elastomer further comprises reinforcing fibers.
  - 109. (Original) A biosynthetic heart valve made according to the method of Claim 103.
  - 110. (Original) A sewing ring made according to the method of Claim 103.
  - 111. (Original) A stent made according to the method of Claim 103.

U.S. Serial No. 10/612,082 Filed: July 2, 2003 P8792.05

112. (Original) A vascular graft prosthesis made according to the method of Claim 103.
